

BW  *ideal*

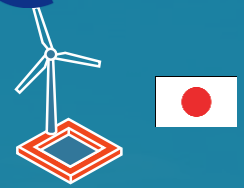

BW Ideol in
France and
Japan,
successfull
collaborations
with both NEDO
and ADEME

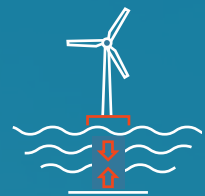

First full-scale offshore wind turbine installed in France

First full-scale foreign floating wind technology installed in Japan

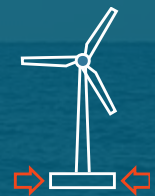

Pioneer and leader in concrete hulls and synthetic mooring solutions

Buildable in steel or concrete

Outstanding power production and seakeeping performance

The most compact and shallow-draft solution when fitted with tomorrow's XXL offshore wind turbines

Dozens of ongoing R&D projects to accelerate the cost reduction trajectory of floating wind

2 full-scale assets operating successfully since 2018

Accumulated output of
19+ GWh at end of 2021

Excellent power production
performance in 5.6-metre
significant wave height and
23.4 m/s winds

 Floatgen - France

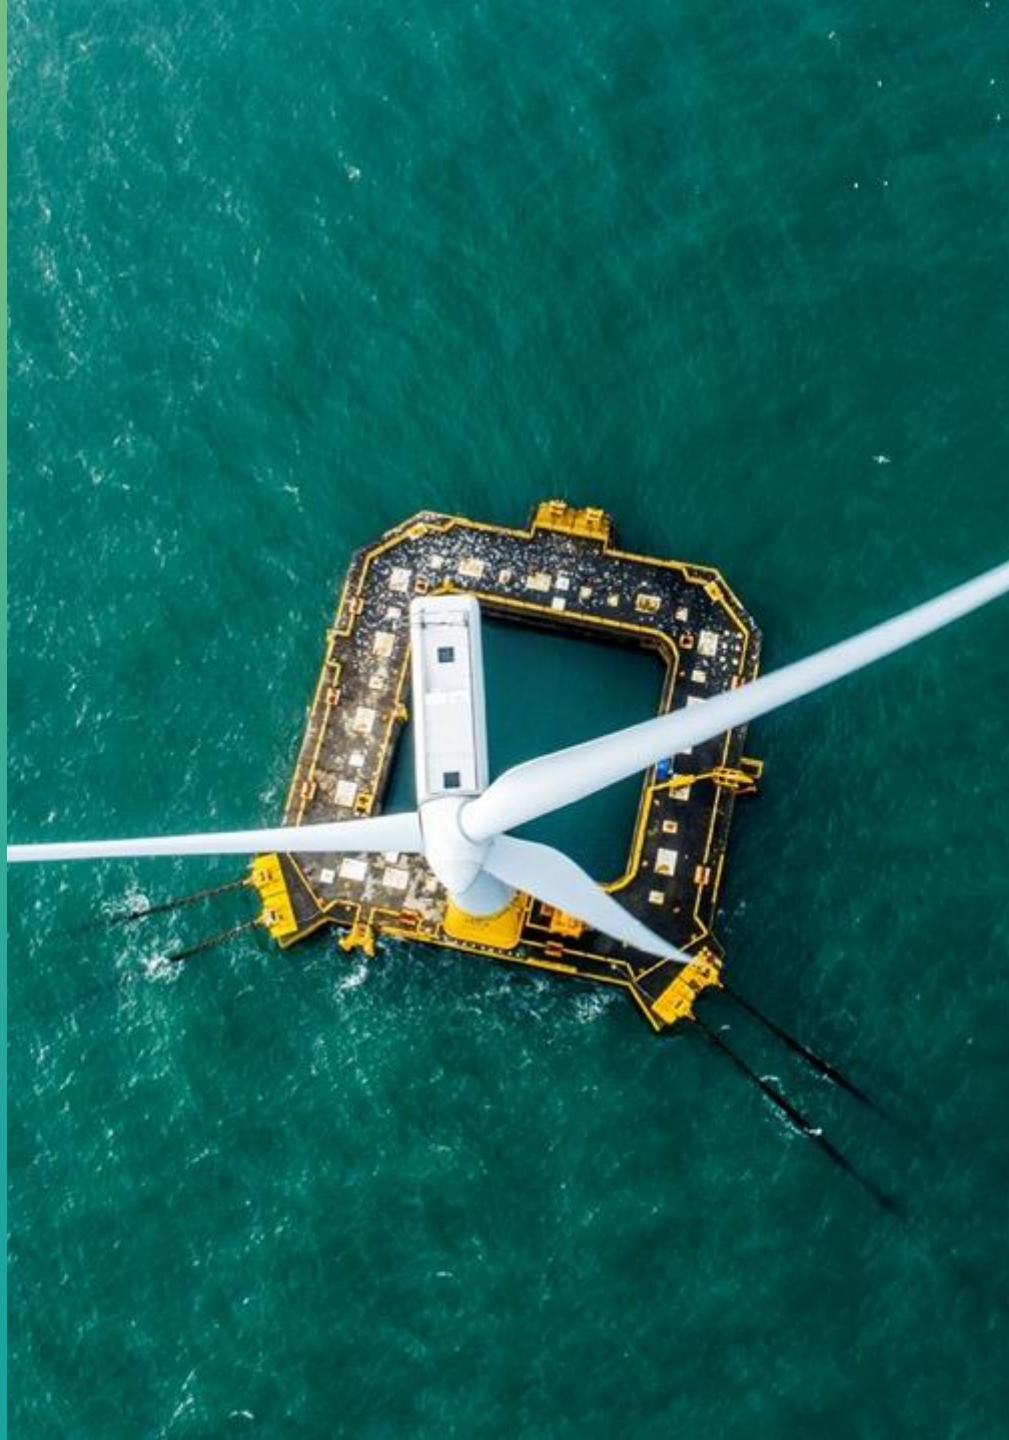

Successfully
weathered several
category 5 typhoons

 Hibiki - Japan

A truly universal technology suitable
for all environmental conditions and all continents

Projects across the globe with France and Japan as 2 of our most strategic markets

Positioning as both proven technology provider AND project co-developer / equity investor

- France
- Japan
- Scotland
- Wales / Cornwall
- California
- Taiwan
- South Korea
- Norway
- Spain
- Italy
- Greece
- Portugal
- Etc.

BW Ideol and Tohoku Plan New Floating Wind Project Offshore Japan

BUSINESS & FINANCE

May 12, 2022, by Adrijana Buljan

BW Ideol and Tohoku Electric Power have signed an agreement to jointly develop a commercial-scale floating wind farm off the coast of Kuji city in Iwate prefecture

The companies have now initiated the feasibility studies necessary to develop BW Ideol's Damping Pool technology.
